

**Upcycler of end-of-life tyres & Manufacturer of sustainable rubber tiles & floorings for fitness and safety**

ErgoFloor A/S was founded in 2000 by Uffe Mølgaard and Michael Moric, both mechanical engineers with more than 20 years of experience in production technology and R&D, with the goal sustainably to upcycle end-of-life tyres to new valuable products.

After 11 years, all production was in 2011 moved to the subsidiary, ErgoFloor Vietnam Rubber Ltd.

By the use of sustainable, unique and environmentally friendly production methods, a wide range of different rubber surfaces and floorings etc. have since then been produced by ErgoFloor Vietnam to improve safety and welfare for humans and animals.

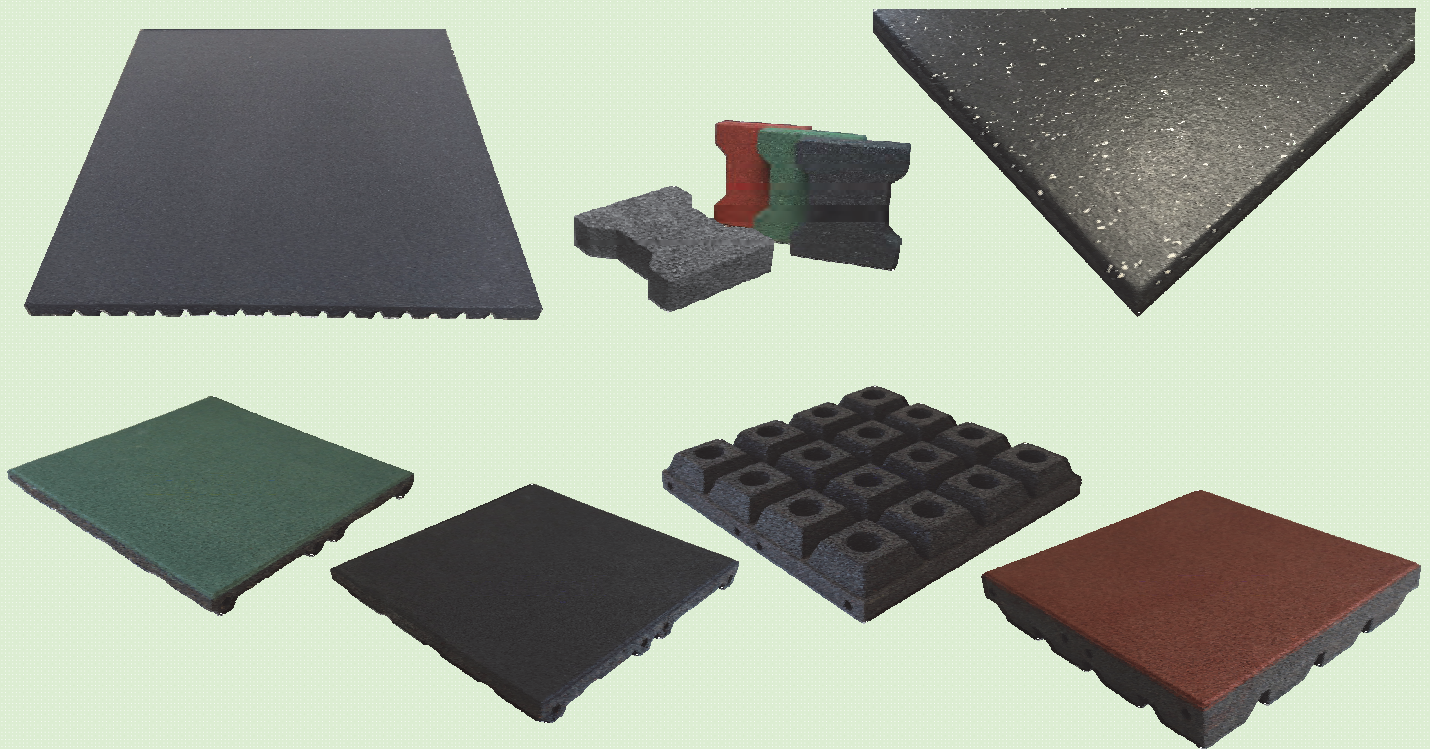

Early 2017, ErgoFloor Vietnam moved to a brand new factory building and in 2020 the neighbour building was acquired. Thereby the total factory and warehouse area was increased to about 2500 m<sup>2</sup> with an annual capacity of about 5.000 tons of rubber floorings and moulded rubber products.

Based on our broad know-how and the modern production technology in the new factory, ErgoFloor has achieved a position as a leading manufacturer of floorings and surfaces produced from recycled rubber.....We produce high European quality at competitive prices.

Concurrently with the development of ErgoFloor Vietnam, ErgoFloor A/S has complemented the product program with a wide range of rubber and LVT floorings, equipment mats, training mats, playground safety surfaces and stall mats etc. and has become a substantial international producer and distributor of floorings and surfaces, primarily produced from upcycled materials.

Our code of ethics is, that we through our activities shall contribute to a sustainable and environmentally friendly upcycling of waste rubber into new and valuable rubber surfaces and rubber products. With that in mind, we are now covering the need for impact reducing, durable and cost-effective floorings for several major- and many minor players in the fitness- & playground industry.

**Impact reducing • Durable • Comfortable**

We are specialized in delivering durable flooring solutions for fitness, sports and play and have been in the business for more than 20 years. Our wide know-how, experience and product portfolio, are your guarantee for the achievement of the right cost-effective solutions to cover your special needs.

Please contact us for a discussion about what we can do for you.
